Re: KFAQ (AM), San Francisco, California
Facility Identification Number: 24510
New Inspiration Broadcasting Company, Inc.
Special Temporary Authority

Dear Counsel:

This is in reference to the request filed August 18, 2011, on behalf of New Inspiration Broadcasting Company, Inc. ("NIBC"). NIBC requests special temporary authority ("STA") to operate Station KFAQ with parameters at variance.¹ In support of the request, NIBC states that a new electric power plant is under construction approximately 1000 feet northwest of the KFAQ array. According to the engineering statement accompanying the STA request, the nearby construction occasionally causes KFAQ's antenna monitor parameters, which were determined by a Method of Moments proof of performance pursuant to 47 C.F.R. Section 73.151(c), to shift briefly beyond the permitted tolerance of +/- 5 percent current ratio and +/- 3 degrees phase.

Our review indicates that a power reduction is not necessary in this case. Accordingly, the request for STA IS HEREBY GRANTED. Station KFAQ may operate with antenna monitor parameters at variance for the duration of the nearby construction. It will be necessary to reduce power or cease operation if complaints of interference are received. NIBC must use whatever means are necessary to protect workers and the public from exposure to radio frequency radiation in excess of the Commission's exposure guidelines. *See* 47 CFR § 1.1310.

This authority expires on **February 27, 2012**.

STA Advisory: Section 309(f) of the Communications Act of 1934, as amended, authorizes the Commission to grant STA in cases of "extraordinary circumstances requiring temporary authorizations in the public interest and when delay in the institution of the temporary operations would seriously prejudice the public interest." However, Section 309(f) is not a means by which a licensee/permittee may circumvent established processing procedures which require the filing of an application, nor is it a means by which a broadcaster may enhance his facility or make operation more convenient for the broadcaster. Stations operating with less than licensed facilities under temporary authorities can be viewed as receiving the benefit of a larger protection area than that in which they are currently providing service.

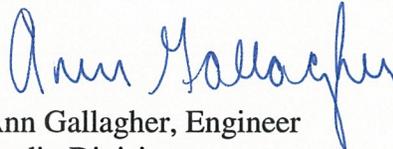

¹ KFAQ is licensed for operation on 1100 kHz with 50 kilowatts, unlimited hours, employing the same directional antenna pattern daytime and nighttime (DA-1-U).

Accordingly, Special Temporary Authorities by nature are to be temporary and are not intended for extended use. Licensees of stations operating under temporary authorities are reminded that timely restoration of permanent facilities is the responsibility of the licensee and should be undertaken expeditiously. Any request for extension of special temporary authorities carries an increased burden with each subsequent request.

Therefore, requests for extension of STA will be granted only where the licensee can show that one or more of the following criteria have been met:

- Restoration of licensed facilities is complete and testing is underway;
- Substantial progress has been made during the most recent STA period toward restoration of licensed operation; or
- No progress has been made during the most recent STA period for reasons clearly beyond the licensee's control, and the licensee has taken all possible steps to expeditiously resolve the problem.

Sincerely,

Ann Gallagher, Engineer
